Thanks! There's a myth out there that good eye sight means your eyes are perfectly healthy. Diabetes can slowly change your eyes over years and you may not notice changes until you can't treat it as well. Catching signs early can help stop any eye problems from changing your vision later. And we can help you schedule your appointment for your eye exam.

If you'd like one of our staff to call you to schedule an appointment, Press (1).

To opt out of this campaign Press (3).

To repeat the message Press (9).
