

# DIABETIC RETINOPATHY?

## A GROWING ISSUE

Diabetic retinopathy is the leading cause of blindness in working-age adults ages 20–74.

### WHO IS AT RISK?

All people with diabetes – both type 1 and type 2 – are at risk.

### NO EARLY SYMPTOMS

However, over time, diabetic retinopathy can get worse and cause vision loss or blindness.

### POTENTIAL SYMPTOMS:

- Blurred vision
- Fluctuation in vision
- Vision loss
- Difficulty in perceiving colours
- Dark areas in vision
- Spots in vision

IN MANY CASES,  
THE DISEASE  
HAS PROGRESSED  
TO AN ADVANCED  
STAGE BEFORE  
SYMPTOMS ARE  
OBSERVED.

## 95%

### REDUCED RISK OF VISION LOSS

Early detection, timely treatment, and appropriate follow-up care can reduce the risk of severe vision loss by 95 percent.
