

A lot of things can catch us off guard.  
**Diabetic eye disease**  
doesn't have to.

Dear Raju

Diabetic Eye Disease is a complication of diabetes that has no warning and signs and can lead to blindness. It is vital that you have regular eye checks to detect retinopathy before your vision becomes badly affected.

Eye Exam is especially important for protecting those at high risk of diabetes

our specialist**

High blood sugar (glucose) level can weaken and damage the tiny blood vessels in the retina which result in various problems

- Small blow-out swellings of blood vessels
- Small leaks of fluid from damaged blood vessels (exudates).
- Small bleeds from damaged blood vessels (haemorrhages).
